STUDENT(S) DETAIL:

Full Name	Mobile No.	Email address

MENTOR(S) DETAIL:

Full Name	Mobile No.	Email address

A short synopsis of your proposed intelligent solution around the theme of "Future Cities - 'Digitalisation, Mobility and Sustainability'"

Provide an introduction and background to the idea you are proposing (max 50 words)

Outline your vision of Future Cities for an intelligent solution and explain in what way it would be innovative (max 50 words)

Identify the gap your proposed solution would be addressing in the Middle East (max 50 words)

Specify the target group for the solution (max 50 words)

Describe the mechanism, methodology and likely involved stakeholders for the implementation of the solution (max 50 words)

Provide a basic breakdown of anticipated costs associated with the implementation of the solution (max 50 words)

Outline the anticipated benefit of the solution (max 50 words)

Supporting material is instrumental in helping our judges to assess the projects. Please include material which you feel best supports your proposal – research papers, drawings, pictures or power point presentations. This must not exceed 5 pages and 5MB in total. Any material above this size will not be considered.

Please note all submissions and supporting materials need to be submitted electronically by
9th January 2020 before 5pm GST idina.fernandes@informa.com.com.

Submissions made after this date will not be accepted.

Shortlisted projects must be set up for display on Monday 2nd March 2020.

Contestants must attend all three days of the exhibition to explain their product to Judges as well as to the voters
(3-5 March 2020)
