Global Innovation Hub

From world-leading solar potential to bold national visions, the Middle East region is no longer just producing energy; it's designing its future. With deep capital, rising clean tech investments, and a drive to modernise ageing infrastructure, the Middle East is fast becoming a global force in the energy transition.

That's where **Global Innovation Hub** at Middle East Energy comes in, a high-energy launchpad for breakthrough technologies, bold ideas and the minds shaping tomorrow's power systems.

This isn't your typical showcase. It's where smart grid disruptors, AI-powered systems, storage game-changers, and next-gen clean energy solutions collide — live, loud and in front of the region's most influential players.

Whether you're building the next big thing or scouting for it, this is where the future of energy gets real.

Why Global Innovation Hub?

The **Global Innovation Hub** is designed to accelerate industry transformation by connecting real innovators, cutting-edge technologies, investors and decision-makers through curated, interactive experiences. It is a space where ideas become action and prototypes become power plays.

The core features include:

The Innovation Challenge

Live pitch competition in a dynamic Dragon's Den format – where pre-qualified startups, scale-ups and disruptors compete for attention, funding and partnerships.

Product showcases

Cutting-edge solutions and next-gen technologies on display – from AI-powered systems to breakthrough grid innovations and smart energy tools.

Innovation Finale

The top-performing innovations will battle it out in an exclusive winner's circle, judged by a panel of expert investors and industry leaders.

Matchmaking & Networking arena

Curated hub for strengthening business connections between innovators, investors, utilities and Original Equipment Manufacturers (OEMs).

Lightning Keynotes

Insights from global trailblazers, policy drivers and innovation leaders who are moving the energy sector forward.

Building on proven success

Following the remarkable success of the **Global Innovation Forum, Middle East Energy 2026** will feature the **Global Innovation Hub**, a premier platform designed to be dynamic, competitive and immersive that showcases groundbreaking innovations driving transformative progress in the industry.

The **Global Innovation Forum** was launched at **Middle East Energy 2025**. With an objective of driving technology and innovation in the energy sector, the forum spotlighted pre-qualified startup founders from various countries, each pitching their solutions to an audience of investors, mentors, and executives from leading energy corporations. The hosted networking reception at the forum brought together key stakeholders to explore partnerships and investment opportunities.

Key outcomes of Global Innovation Forum 2025:

30+
Speakers

20+
Investors

17,000+
Registrants

12
Pre-qualified founders
from 9 countries

Global Innovation Forum 2025 key partners:

Freezone Partner:
